

**PUBLIC NOTICE
FOURTH FIVE-YEAR REVIEW
FOR FORMER NAVAL TRAINING CENTER
ORLANDO, FLORIDA**

The Department of the Navy, in conjunction with the Florida Department of Environmental Protection (FDEP), is conducting the fourth five-year review of the selected remedies being implemented to address environmental contamination at Former Naval Training Center (NTC) Orlando, Florida. The purpose of the five-year review is to ensure that the selected remedies are effectively protecting public health and the environment as intended.

Under the Comprehensive Environmental Response Compensation and Liability Act (CERCLA, also known as Superfund), reviews of long-term remedial actions are required every five years to ensure continued protection of human health and the environment until the sites are deemed suitable for unlimited use and unrestricted exposure. This fourth five-year review will focus on the continued effectiveness of the remedies at the former North Grinder Landfill, Operable Unit 1 (OU-1). The Navy will solicit concerns and comments about the site remedies through questionnaires and interviews with interested parties. The Navy plans to complete this review by October 16, 2020. A subsequent public notice will announce the completion of the Fourth Five-Year Review Report and its availability at the Former NTC Orlando Information Repository located at Orange County Public Library, Orlando Branch (4th Floor), 1010 East Central Boulevard, Orlando, Florida 32801, (407) 835-7323, and the Navy's BRAC website, www.bracpmo.navy.mil.

Public participation in the five-year review process is encouraged and welcomed. If you are interested in participating in the interview process or if you have questions or would like more information about the site under review, please contact:
